Model S4HAMWE000

# Specifications

## Onyx Tri-Strip and Single Brush Strippers

24" Single Brush Stripper  
Model S4HAMWEOOO

### Product

- Powered by Kawasaki and Honda
- Rugged cast aluminum alloy housings
- Extra durable splash guards
- Carbon impregnated nylon brushes
- Hour meter aids in scheduling service
- Powder coat finish resists oxidation and chemical damage
- Easy clean-up

### Ease of Use

- Absolutely no torque
- Handle easily adjusts to operator's height
- Tank changes made easy with drop-in bottle carrier and quick-snap fastener
- Large non-slip tires assist transport and control (Strip/Buf Combo)

### Productivity

- Engine options maintain speed under heaviest loads
- Brushes strip old finish faster
- Large 20 pound propane tank for more working time between refills
- Automatic compression release reduces starter wear (Kawasaki only)
- Aggressive brush speed of 330 RPM keeps stripper solution under machine
- Single brush 510 RPM

### Safety

- Low oil shut-down system protects engine (Kawasaki)
- UL approved propane system components
- Non-slip tires give operator more control under slippery stripping conditions
- Electric clutch

### Options/Accessories

- Catalytic muffler
- C.O. guard
