Advance Sprite® and Sprite Air Scoop™ Wet/Dry Tank Vacuums

The Advance Sprite® and Sprite Air Scoop™ Wet/Dry Tank Vacuums are Truly Versatile Products for Many Time and Labor Saving Jobs.

With today's high cost of labor, why waste time with mops and buckets? Put an Advance Sprite® on the job and start saving money.

The Advance Sprite® is available in 12-gallon (45 L) or 16-gallon (60 L) tank sizes. It has a rugged, rotationally molded polyethylene tank that is corrosion proof and will not chip or dent.

It conveniently pivots on a hinge to dump its contents or drains through a built in hose. The entire tank lifts off for cleaning and allows total access for motor service or maintenance.

The powerful, yet quiet, 70 dB A, 1.3 hp 2-stage, by-pass motor is located under the tank for protection from water and debris. A float system stops recovery to prevent tank overflow.

For dry pick up, insert a sock filter or a reusable cloth bag, and use any of the dry pick up accessories. A washable exhaust filter helps assure dust containment.

Advance Sprite Air Scoop™ models pick up water faster than those with a hose and wand, they are especially effective in tight spots too. The 24-inch (60 cm) front-mounted squeegee maneuvers right up to walls and into corners, picking up either in forward or reverse. A simple floor pedal raises or lowers the squeegee, which is spring loaded to follow floor contours for thorough results.

Ideal Applications Include —

- Hospitals/Healthcare Facilities
- Schools and Universities
- Government Buildings and Installations
- Supermarkets
- Shopping Malls
- Warehouses
- Distribution Centers
- Retail Stores
- Airports

VALUE FEATURES

Save time and labor with the Air Scoop™ front mounted squeegee.

Rugged construction with durable components assures years of reliable performance.

Easy access motor can be released by removing four bolts.

Low sound level permits operation anywhere, anytime.

Rotomolded handle allows comfortable operating positions for all users

A built in float system automatically cuts off the vacuum air flow when the tank fills with liquid, preventing overflow

A cleanable, reusable filter keeps exhaust air clean and muffles vac motor sound

The Sprite includes an 8 piece wet or dry pick-up tool kit for complete versatility

A sock filter goes over the float assembly for dry pick up, and a cloth bag can be inserted into the tank for dry vacuum operation

A 1.3 hp motor is located under the tank for protection from water and debris

Tough polyethylene construction and functional design assure durability, dependability

Large rear wheels make transport easy, even up or down stairs

Front caster wheels provide "easy action" transport

The Sprite Air Scoop includes a 24 in (61 cm) front mounted squeegee

Roto-molded poly tank is hinged for tip and pour emptying. The tank can be completely removed from the base for easy clean-out.

Positioned at the lowest point in the tank, the drain hose provides an alternative draining method.

Simple design gives direct access to modular vac motor. Four bolts and motor is released for service or replacement.

The front mounted squeegee on the Sprite Air Scoop can increase productivity by 80% over manual pick up tools.

The base has an easy to use, rugged on/off switch. The Air Scoop models also have a pedal for operating the front mounted squeegee.

VALUE FEATURES

The Advance Sprite®, designed with Total Clean™ Technology, is very comfortable and safe to use — by design. The result is increased productivity. The Advance Sprite® is also designed with features to make it easy to clean up and maintain after cleaning. That reduces the total cost of ownership and drives down the cost of cleaning.
