

*Equipment solid
to the KOR*

- Increased Productivity
- Superior Construction
- Simple Design
- Ease of Maintenance
- Dry Vac Port
- Water Tank
- Quick Change Diamonds
- KOR™ Gearbox
- EPA & CARB Approved

The G&P One is all about productivity. It is a solid Grinder and Polisher. No need for two machines on site, just one G&P One. A hefty, 1,300 lbs of concrete grinding muscle, taking concrete surface prep, grinding and polishing to new levels.

No back charges on jobs for utility bills. No need to pay for an onsite generator to power your equipment. Propane fuels the 22 hp Robin engine that is certified to meet EPA and CARB requirements with an Emissions Shut Down System and clean burning catalytic muffler. With a 30" cordless path, it utilizes three 13" rotating heads. Instead of multiple diamond changes, only three pre-loaded quick change plates are needed for each grit.

Wet grinding features include an 11 gallon water tank. Dry polishing features include a rear vacuum port located near the floor for more efficient dust collection. The frame of the machine routes the vacuum hose out to one side to keep the hose clear from machine operator.

Mechanical features include a Heavy Duty Kill Switch, Centrifugal Clutch, Vernier Throttle, and KOR™ Gearbox.

The G&P One comes standard with a Tach O Meter that displays engine hours, engine RPM and Service Intervals. Aluminum safety fuel cylinder with overfill prevention device (OPD) UL and DOT approved and Two Year limited warranty.

G&P One	
Production	800-1,300 sq.ft. per hour
Engine	Robin 22hp (653 cc)
Engine Speed	3,200 rpm
Drum Speed	1,410 rpm
Head Speed	840 rpm
Grinding Pressure	785 lbs
Grinding Diameter	30
Box Dimensions	L80 xW38 xH55
Shipping Weight	1,385 lbs
<i>All STONEKOR equipment are EPA and CARB certified for exhaust emissions.</i>
