

Keeping large carpeted areas looking great has never been so easy!

The CleanMax Wide Area Vacuum is a workhorse of immense proportions, vacuuming up to 10,000 more square feet per hour than an ordinary upright vacuum. With outstanding durability, 4-stage clean air filtration and many convenience features, this vacuum meets the daily demands of cleaning professionals who maintain large carpeted areas.

Not just one, but two high-efficiency vacuum motors and an 1800 RPM brushroll motor work to loosen and remove dirt and revive carpet pile so carpets in high-traffic areas get clean, look great and the flooring investment is protected. Solidly constructed with non-marking rubber wheels, casters and steel tube handles, the Wide Area Vacuum is powerful, durable and enables operators to do more work in less time.

SPECIFICATIONS

Model	Wide Area Vacuum
Base Dimensions (H x W x D)	20" x 30" x 36"
Base Construction	Rotationally-Molded Housing and Lid
Handle Length	30"
Handle	Steel Tubing, Fully Adjustable
Vac Motors (2)	1 HP, 115V
Vacuum	224 CFM
Static Waterlift	63"
Brush	Nylon Bristle with Plastic Core
Brush Dimensions (W x DIA.)	28" x 3"
Brush Speed	1800 RPM
Brush Motor	2600 RPM PMDC, 5-HP
Brush Height Adjustment	5 Pile Settings
Drive Belt	6 Groove Poly-V
Filtration	4-Stage Clean-Air
Filter Bag Capacity	1.6 Bushels
Overload Protection	15 AMP Reset Breaker
Rear Wheels	10" Non-Marking
Front Wheels (Dia.)	2" Non-Marking Swivel Casters
Sound Level	70 Decibels to Operator
Weight (Net/Shipping)	95 lbs. / 113 lbs.
Power Cord	75' (14-3)
Power	115V / 60Hz
Replacement Filters and Bags	
CM-WAV10	Disposable Paper Filter Bags (Pack of 10)
19816	1 Outer Clean-Air Cloth Bag
19855	1 Filter & 1 Exhaust Filter

Ease of use

As a convenience for operators, a handy foot pedal with five settings adjusts the vacuum to the appropriate carpet height. A cushioned grip handle adjusts for comfort, and a safety switch on the handle eliminates bending over to power up the vacuum. With a 75-foot power cord and giant vacuum bag, operators can vacuum for a long time without having to switch outlets or change bags.

Cleaner Carpets and Healthier Environment

Four stages of filtration means cleaner carpets and cleaner air.

Stage 1: A large capacity disposable paper filter bag keeps dirt where it belongs.

Stage 2: The paper filter bag is enclosed in a reusable cloth filter bag for an extra layer of filtration.

Stage 3: Each of the two vacuum motors contains an intake filter.

Stage 4: On the other side of the motor, a high-performance cartridge filters the motor exhaust.

Compact Storage

Equipment storage space is always limited, so the Wide Area Vacuum folds up and stands vertically on end to fit in tight spaces.
