VANQUISH™

Air Scrubber

Tough on hazardous particles.

The power of HEPA. The efficient, lightweight Vanquish™ Air Scrubber is ideal for heavy duty restoration or any jobsite where indoor air quality is important. It features a pre-installed Mytee® HEPA filter that removes at least **99.99%** of airborne particles 0.3 micrometers in diameter.

The Vanquish™ Air Scrubber is stackable for maximum coverage, and can also be used as a Negative Air Machine in order to set up negative or positive pressure isolation rooms.

Features:

- 16" air intake for airflow efficiency and maximum particle collection.
- Indicator light illuminates when it's time to change the HEPA filter.
- Auxiliary 12 amp AC outlet for daisy-chaining additional units.
- Variable speed control – 500 CFM.
- Intake cap also functions as a cord wrap.
- 25' **lighted** power cord.
- Easy filter changing – **no tools required!**

- Flood Restoration
- Fire Restoration
- Mold Remediation
- Odor Elimination

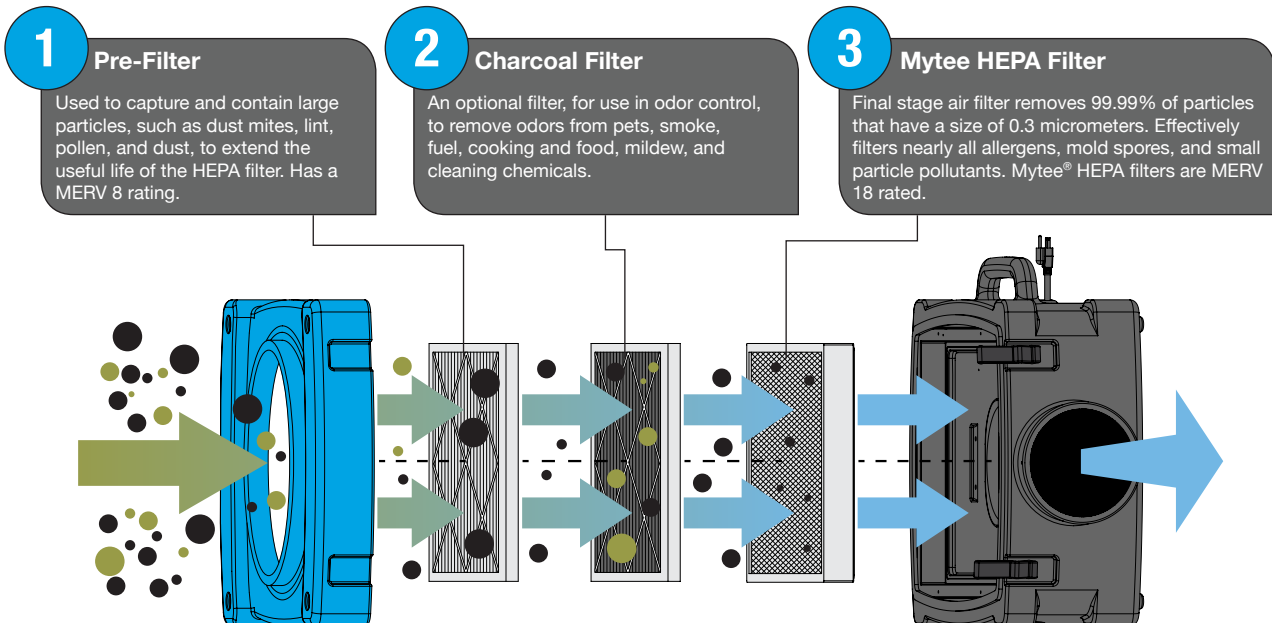

Daisy-chain multiple units together using the 12 amp outlet

Also available in green and red
