## Advance Terra® 128B Rugged Battery Sweeper

### Designed for Industrial Sweeping...

The Advance Terra® 128B sweeper has been engineered to address a wide span of floor cleaning needs. The main broom counter rotates against the direction of travel providing superior cleaning. The side broom can be lowered to edge clean while you sweep.

The Terra® 128B is quiet to not disturb, or even be noticed by others close by. Since it is battery operated, you have free roaming abilities and no cord tripping hazards. The large 1.4 cubic foot (40 L) hopper and over-throw sweeper design allows you to spend more time cleaning and less time emptying the hopper.

Cleaning all floor surfaces, even in the most congested areas, the Advance Terra® 128B provides maximum performance for greater productivity.

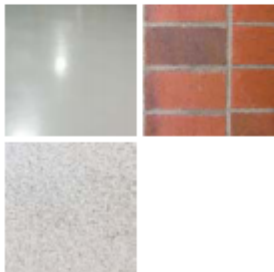

### Ideal Applications Include —

- Sidewalks and Curbs
- Airports
- Factories
- Machine Shops
- Warehouses
- Congested Aisles

The Terra® 128B has excellent dust control. It utilizes a two-stage filter system that consists of a prefilter grid and a main panel filter. The prefilter traps larger light debris and particles allowing the main filter to work more effectively. The manual filter shaker frees up dust from the filter to maintain high dust control efficiency. An electric filter shaker option is also available.

The onboard charger makes recharging the unit fast and simple. Recharge at anytime and anyplace without the need for a special battery room.

Since productivity matters, the Advance Terra® 128B is over ten times more productive than a person working with a manual push broom. And since the Advance Terra® 128B is powered with traction, operators remain fresher for other operations after sweeping.

VALUE FEATURES

Two stage dust control system for more effective dust control. Access filters without tools.

Sweeps up to 34,000 ft<sup>2</sup> (3,159 m<sup>2</sup>) per hour

Turn the key and the full system is operational

Onboard charger provides the flexibility to charge anywhere

No tools needed to access brooms and dust filter

Main broom easily removed and replaced without the use of tools.

Convenient onboard charger provides flexibility to charge at anytime, anyplace.

Ergonomic, height adjustable handle design with conveniently located controls for safe and easy use by the operator.

No tools required to access brooms and filter. Hood opens providing full maintenance accessibility to the cleanly engineered internal systems.

Excellent edge cleaning results from side broom. Eliminates secondary edge cleaning operation common with vacuuming.

VALUE FEATURES

*The Advance Terra®128B, designed with Total Clean™ Technology, is very comfortable and safe to use — by design. The result is increased productivity. The Advance Terra® 128B is also designed with features to make it easy to clean up and maintain after cleaning. That reduces the total cost of ownership and drives down the cost of cleaning.*

## Advance Terra® 128B — Durable, Economical Sweeping Solution

### Industrial Strength Solutions...

- Our products are built tough and feature innovative technology that increases productivity and drives down the cost to clean.
- You can get expert service and maintenance for your products by factory-trained personnel around the world, as well as fast parts delivery.
- Maintain peak performance with genuine APA parts.

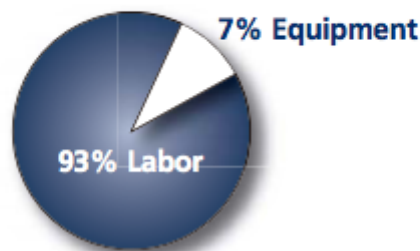

### Clean up on your bottom line with higher productivity equipment

Labor is by far the major component of overall cleaning costs. Equipment cost is typically only 7% of the overall cost.

Products that provide a significant productivity increase, like the Advance Terra® 128B, pay for themselves in labor savings in a very short time.

### Cleaning Costs

### Accessories

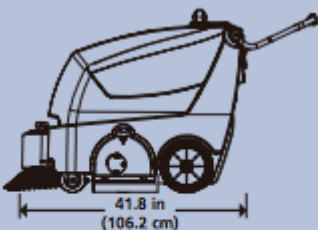

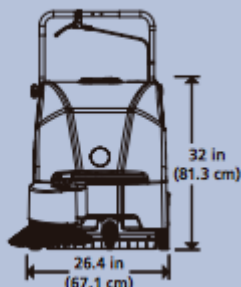

**Brooms:** Various main and side broom options are available for different applications.

**Dust Filters:** Filter options are available that provide higher filtration and/or water washability.

### Technical Specifications

<b>Sweeping Path</b>	28 in (71 cm)
<b>Main Broom</b>	20 in (51 cm) x 10.5 in (27 cm)
<b>Side Broom</b>	14 in (42 cm) diameter
<b>RPM</b>	400
<b>Hopper Capacity</b>	1.4 ft <sup>3</sup> (40 L)
<b>Dust Filter</b>	Resin-coated, pleated paper panel, 27 ft <sup>2</sup> (2.5 m <sup>2</sup> ) area
<b>Motor</b>	600 W
<b>Standard Batteries</b>	Two 6 V, 238 Ah or One 12 V, 105 Ah
<b>Max Speed</b>	2.8 mph (4.5 kph), forward only

<b>Machine Weights</b>	
<i>Machine Only</i> –	(with onboard charger) 203 lb (92 kg)
<i>Battery Weights</i> –	Two 6 V, 238 Ah — 132 lb (60 kg) One 12 V, 105 Ah — 54 lb (25 kg)
<b>Battery Charger</b>	Standard onboard, 12 V, 20 amp, wet/dry
