

Z20T and Z20BA Automatic Scrubbers

Small in stature, big on scrubbing performance

Z20T and Z20BA

One of Pacific's most popular scrubbers, the single disk Z20T and Z20BA models suit a variety of cleaning applications and facility sizes. The Z20T/Z20BA feature simple controls and easy to read gauges that provide operators with a high comfort level. The Z20T/Z20BA auto scrubbers' 20" cleaning path, 16-gal tank capacity and 30" squeegee

make them a mainstay of almost any hard floor care program. The unique hands free pad on/off feature makes pad changes as easy as pushing a button. The Z20BA is a brush assist model and the Z20T comes standard with a transaxle. Add the Z20BA or the Z20T auto scrubbers to your floor care program today.

TECHNICAL SPECIFICATIONS

	Z20T/Z20BA
Cleaning Width	20"
Avg. Productivity	18,500 ft ² /hr.
Run Time	3.2 hrs.
Brush Diameter	(1) 20" disk
Brush RPM	250 rpm
Brush Pressure	55 lbs
Brush Motor	0.54 hp
Traction Motor	0.54 hp / (BA) NA
Drive Type	Variable / (BA) Brush Assist
Vacuum Motor	0.6 hp
Solution Tank	16 gal.
Recovery Tank	19 gal.
Power System	24V DC
Battery Type	(2) 12V 145 AH
Charger	24V 15 Amp
Length/Height	59"X41"
Width	21.7" (30" w/squeegee)
Wt. w/out Batteries	230 lbs. / 220 lbs.

Z20T/Z20BA Features & Benefits

The pressure, angle and height of the squeegee can be easily adjusted. Two squeegee support wheels ensure smooth movement along the cleaning path.

The heavy duty squeegee assembly can be quickly removed, no tools needed, by pulling on two latches. This makes transportation through doorways or in and out of vehicles a breeze. In addition, no tools are required when changing the blade from one of the four useable sides.

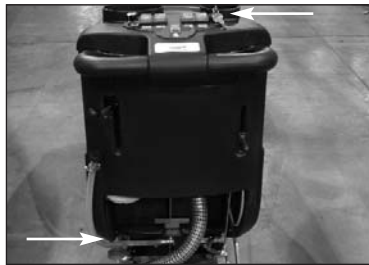

The Z20T/Z20BA console is simply and intuitively designed and able to hold chemicals, keys, cell phones or other items to keep operators organized. The Z20T comes standard with a variable speed potentiometer, which provides the operator a full range of scrubbing speeds for effective, productive operation.

The Z20T/Z20BA auto scrubber's drain hose is located in the front of the machine so that it can be easily and conveniently driven into tight janitorial closets to be emptied.

The Z20T/Z20BA auto scrubber's electronic components are easily accessible for service - undo two latches and remove four screws.

The Z20T/Z20BA comes standard with a parking brake and key switch, ensuring that the machine stays put when it should.

The Z20 auto scrubbers have a clean out solution drain hose to allow the operator to easily remove all water from the solution tank and also acts as a sight hose to indicate the amount of solution in the tank.
