

AquaPro® XP/H/C™

Portable Extractors

AquaPro® XP – Gold
AquaPro® H – Silver
AquaPro® C – Bronze

Smart cleaning.

A Nilfisk-Advance Brand

AquaPro® XP/H/C

Portable Extractors

The Advance AquaPro® with AquaWand™ delivers superior deep-cleaning and more productivity.

The Advance AquaPro® series with AquaWand™ represents the ultimate in portable carpet extractors. AquaPro features deep-cleaning power and built-in conveniences to make operators more productive than ever. Each model is equipped with the AquaWand cleaning tool that is light, durable and more efficient than competitive wands.

A key to the exceptional cleaning performance and productivity of the AquaPro series is the AquaWand extraction tool, standard with each model. The rotomolded, low-friction, * Delrin® glide head on the AquaWand allows it to move effortlessly across carpet. Its laminar airflow design provides increased water pick-up with less time and effort used by the operator. In independent tests, AquaWand left only half as much residual water in carpets as comparable machines. That means better cleaning, faster drying and more time saved.

The AquaPro XP model offers two extraction modes for tough and light jobs. Deep-extraction mode provides 300 psi and 212 degree F solution at the wand tip for superior restoration extraction. With the push of a button, the pressure can be reduced to 75 psi for upholstery or light duty cleaning. This machine has earned the Carpet & Rug Institute's (CRI) Seal of Approval Gold for carpet extraction.

The AquaPro H model also provides the cleaning power of 212 degree F solution at the wand tip, combined with 150 psi for restoration extraction. This model has earned the CRI Seal of Approval Silver for carpet extraction. Both the AquaPro XP and the AquaPro H have an independent circuit locator that identifies when the machine is plugged into separate circuits to prevent blown circuits.

The AquaPro C model is the right choice for lighter jobs. This non-heated, 150 psi model has earned the CRI Seal of Approval Bronze for carpet extraction.

Operators will appreciate the convenience of onboard storage for floor tools and other accessories. All models feature onboard storage of the AquaWand floor tool, self-contained storage for the power cord and a compartment for storing detergent bottles, hand tools and other cleaning items.

Equipped with a 14-gallon solution tank, the AquaPro is large enough to tackle most jobs, yet is compact enough for easy maneuvering and transporting. The solution tank has a clear hose which acts as both a solution gauge and drain hose. The recovery drain hose is designed to easily empty the 12-gallon recovery tank into a commode or slop sink.

Not only does the AquaPro deliver superior cleaning results, but it is also easy to maintain. The clam shell design allows easy access for servicing, and the convenient grips and handle provide assistance when lifting the unit into a vehicle for transport.

* Delrin® is a registered trademark of DuPont

Ideal applications include:

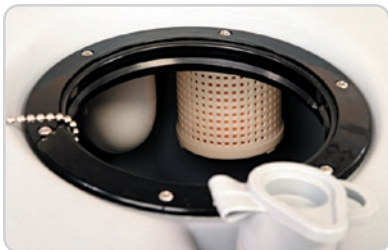

- **Contract Cleaners**
- **Schools and Universities**
- **Office Buildings**
- **Hospitality**
- **Healthcare Facilities**
- **Airports**
- **Government Buildings**

The low friction glide and light weight AquaWand is designed for less operator fatigue.

Waterproof control panel to protect against spills. The solution tank fill port is recessed to contain spills.

Float ball screen protects the vacuum motor.

Finger grips provide assistance when lifting the machine.

Clam shell design allows easy access for servicing.

Independent, disconnect cords for heater and vacuum pump.

The Advance AquaPro® line of portable extractors is available in three models, the XP, H and C. There is a version for a variety of cleaning applications.

Onboard storage of the floor tool

Cord wraps for storage of power cords

Solution hose allows for monitoring solution and dumping

Recovery hose allows for ease of dumping

Outlets allow for the power cord to be disconnected

Handle for lifting into vehicles

Large non-marking rear wheels for maneuverability

Components are recessed to prevent damage

FEATURES AND BENEFITS

Onboard storage of AquaWand and compartments to store cleaning supplies.

Rugged construction with durable components assures years of reliable service.

Clam shell design allows easy access for servicing.

CRI Seal of Approval meets equipment requirements for LEED and GS-42 certification.

Technical Specifications			
Model	AquaPro® XP	AquaPro® H	AquaPro® C
Solution Pump	300 psi / 75 psi	150 psi	150 psi
Solution Tank Capacity	14 gal (53 L)	14 gal (53 L)	14 gal (53 L)
Recovery Tank Capacity	12 gal (45 L)	12 gal (45 L)	12 gal (45 L)
Vacuum Motors	1 - 3 stage	2 - 2 stage	2 - 2 stage
Built-in Heater	Yes	Yes	No
Waterlift	140 in (356 cm)	150 in (381 cm)	150 in (381 cm)

AquaPro® Keeps Operating Costs Down

The Advance AquaPro® is ruggedly built with durable components and systems, so it will keep on working for years. The clam shell design, lifetime warranty heater and waterproof control panel allow for reduced maintenance costs. The Advance AquaPro is an investment in floor cleaning productivity that will pay off for years to come.

Accessories and options:

- 15 foot Solution Hose
- 15 foot Crush-Proof Recovery Hose
- AquaWand™ Cleaning Tool
- 25 foot Disconnect Power Cord
- 25 foot Solution and Recovery Hose (optional)
- Stainless Steel Hand Tool (optional)
