E26 | 26" WALK-BEHIND SCRUBBER

E26 | PRODUCT FEATURES

The E26 is a disc brush scrubber with a 26" cleaning path and is available in traction drive. Advanced technology makes the E26 a part of the innovative walk-behind scrubber line, the E Series. Easy-to-understand controls ensure that the machine is simple to operate. The compact and sleek design results in total operator comfort by focusing on ergonomics and provides an excellent line of sight to the area to be cleaned. The cylindrical deck has an integrated sweeping function and is made of corrosion-resistant aluminum casting. The adjustable handle and ergonomic hand bails offer superior handling of the machine and the traction drive models offer ergonomic, adjustable speed regulation with the turn of a dial. The E26 contains an on-board charger that is convenient and allows the machine to be charged anywhere. When the on-board charger is plugged in, the machine is not operable. The E26 also features simple brush loading and unloading. A parabolic squeegee is standard on the traction drive models and an option on the brush drive models. The squeegees are designed so that no operator adjustment is necessary. This vacuum contains a 19 gallon solution tank and an easy-to-clean, hygienic, 19.5 gallon recovery tank.
