

750

All Surface Cleaner

Tennant has just the right solution for the number one cleaning challenge: restrooms and most other hard surfaces. The Model 750 All Surface Cleaner can clean up to 3 times faster and more thoroughly than the manual "wipe down" method.

Multi-functional Cleaner

The Model 750 ASC is a multi-functional machine that cleans and rinses fixtures and hard surfaces, blow dries the rinsed surfaces and then recovers dirty water. After cleaning, recovery tank easily empties using the drop-down drain hose or power pump-out system.

Cleaning Applications

The Model 750 efficiently cleans sinks, urinals, pools, tubs, shower areas, locker rooms, stairwells, windows and other non-porous hard surfaces. It's an ideal machine for use in schools and universities, senior and child care centers, health clubs, hospitals, nursing homes, sports facilities, retail stores, office buildings, airports and bus and train stations.

"Touchless" A Better Way to Clean

Boost worker morale and productivity with the Model 750 ASC by eliminating hands-on "dirty work."

Use high pressure spray setting to effectively clean and rinse tiled areas from top to bottom.

The 750 is a versatile machine. The optional carpet extraction tool is used to effectively clean carpets.
