

The 800 cleans a wide 66" path, and performs even under the toughest conditions.

The 810 makes light work of picking up rocks, leaves and other debris — and keeps kick-up dust to a minimum.

This rugged machine practically pampers its operators with an energy absorbing seat, tilt steering wheel, power steering, and an adjustable drive pedal.

Dust and moisture are checked by a unique Quad Filtering System that allows the 800 and 810 to operate nearly dust-free, long after others clog.

Model 800 and 810

- 1 To eliminate the need to handle debris twice, the standard 30 cubic ft. multi-level dump hopper empties on the ground or into dumpsters as high as 6 ft.
- 2 The Quad Filtering System uses four separate high-efficiency filters to trap particles.
- 3 Routine maintenance is fast and easy. The engine area, fittings, filters and battery have wide open, easy access.
- 4 Thermo-Sentry™, system monitoring lights, brush down-pressure indicator and a fuel gauge warn the operator of potential problems.
- 5 The 810 offers even greater cleaning quality with an extra sweeping brush.
