- ✓ Impressive sweeping
- ✓ Outstanding scrubbing
- ✓ Exceptional quality
- ✓ In one machine

The Tennant Model 8410 offers the latest technology in both sweeping and scrubbing. And puts them together in one state-of-the-art sweeper/scrubber. What's more, it is built by Tennant, world renowned for quality floor maintenance products.

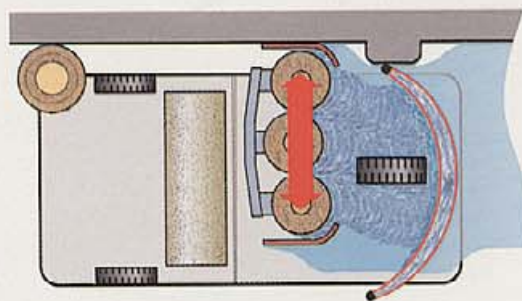

The 8410 gives unsurpassed sweeping in nearly any application. Direct-throw sweeping combines with a II-Speed cleaning system to pick up a range of debris from dust and sand to metal or wood chips, even light, bulky litter.

Impressive scrubbing is the product of aggressive brush action and a high volume pick up system that leaves floors clean and ready for traffic.

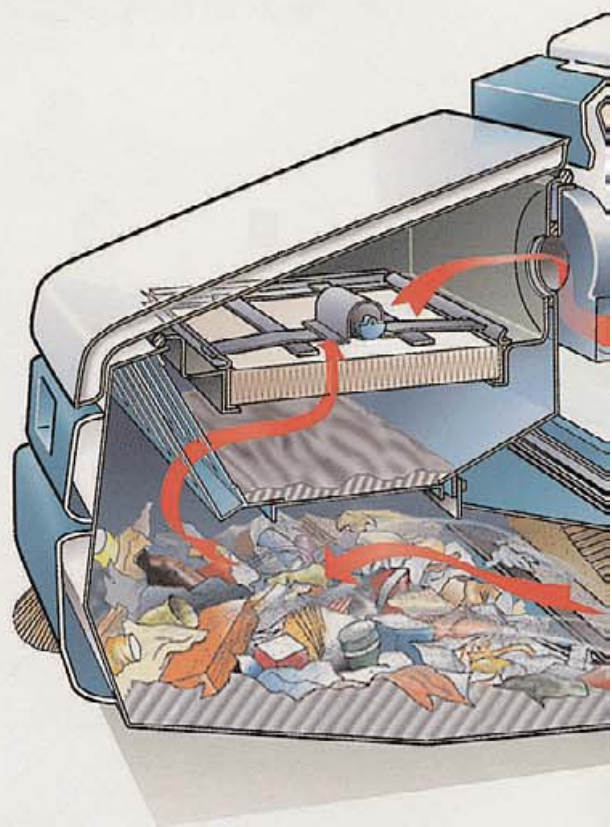

The 8410 delivers excellent water control, *even on turns*. It both scrubs and sweeps right up to walls, pallets and edges. The machine leaves unstreaked floors that are free of dirt and debris.

In all, the Model 8410 Sweeper/Scrubber is an easy to operate, easy to handle, easy to clean, state-of-the-art machine that greatly increases the productivity of your cleaning operation.

• Edge Cleaning

Unique among sweeper/scrubbers is the positionable scrub head that cleans tight against walls, pallets and machinery. It cleans where other sweeper/scrubbers can't.

• Effective Sweeping

The 8410's II-Speed cleaning system picks up a full range of debris indoors or out. It sweeps a 60 inch (1525 mm) path at rates up to 118,000 sq. ft. (11000 m²) per hour. A standard multi-level dump hopper empties into containers up to 60 inches (1525 mm) in height.

• Easy Clean Out

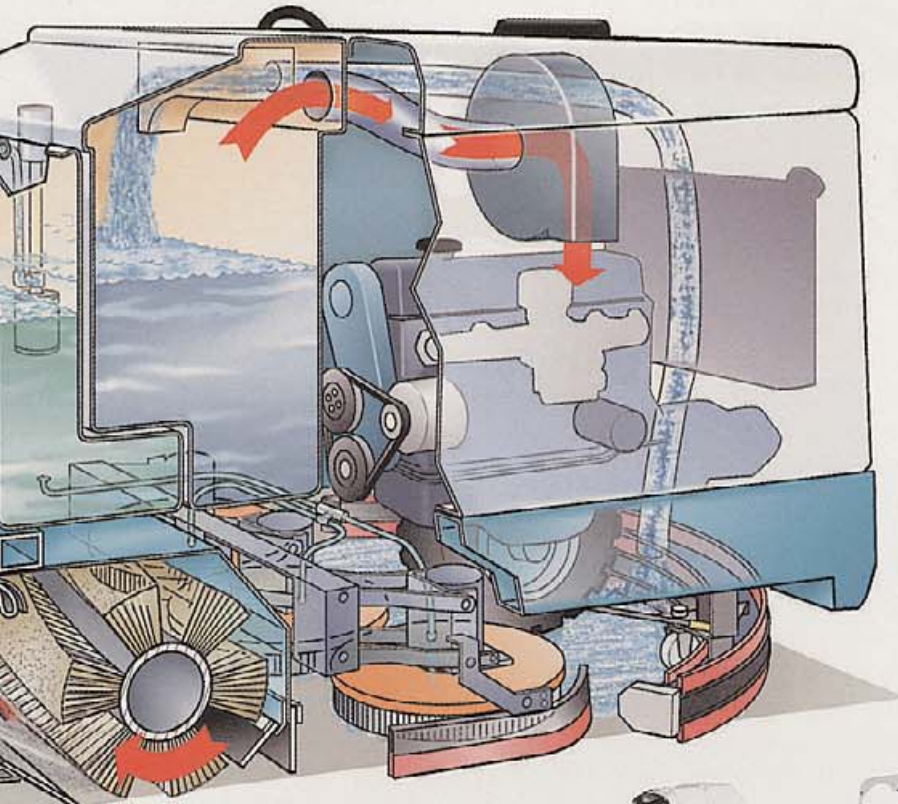

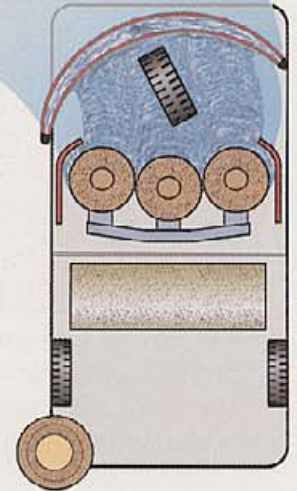

Easy access allows fast, thorough tank clean out. Hoses are protected inside tanks and pull out for easy drainage.

• No Streaking

The sweeping system removes debris that can cause squeegee streaking. A separate fan and specially designed pick up system remove solution from floors, cracks.

• Reduced Spillage On Turns

An innovative swing squeegee tracks the scrub path on turns to contain solution spillage.

• Easy Operation

Single buttons control sweeping and scrubbing functions to simplify operation.

• Fast Maintenance

Brushes and squeegee change quickly, without tools.

• Durability

Dependability comes from premium quality hydraulics, powerful engine, non-rusting durable scrubber tanks, wrap-around bumper, reinforced frame and more.

• Comfort Control

Power steering, tilt-steering wheel, a low-force drive pedal and roomy operator's compartment increase operator comfort.

PRODUCTIVITY ENHANCEMENTS

• 4 Hours of Continual Cleaning

Eliminate unproductive tank refilling with the ES feature. With ES, you can continuously clean for up to 4 hours. This means the area cleaned on one fill is up to 360% greater.

• Clean Hard-to-Reach Areas

Use the optional squeegee wand to increase your productivity and broaden your coverage. Pick up spills from under racks and other places scrubbers cannot access.

CERTIFIED ISO 9001

Symbolizing our commitment to excellence in design, production, installation and service, Tennant has been awarded the ISO 9001 certificate.

SPECIFICATIONS*

Dimensions

Length:	117 in	2970 mm
Width:	63.5 in	1610 mm
Height:	61 in	1550 mm
Height (w/overhead guard):	83.7 in	2125 mm
Net weight (empty):	4,750 lb	2157 kg

Sweeping system

Cleaning path:	60 in	1525 mm
Main brush length:	45 in	1145 mm
Side brush diameter:	23 in	585 mm
Hopper volume:	14 ft ³	400 L
Hopper capacity:	1,200 lb	545 kg
Filter area:	74 ft ²	6.9 m ²

Propelling system

Speed forward:	8 mph	12.9 km/h
Speed reverse:	3 mph	4.8 km/h
Gradeability -		
Transport:	14.1 %	8 deg
Cleaning:	10.5 %	6 deg

Scrubbing system

Scrubbing path:	48 in	1220 mm
Solution tank:	60 gal	227 L
Recovery tank:	60 gal	227 L
Side shift:	6 in	155 mm

Power system

Engine-gasoline/LPG:	63 hp	47 kW
Engine-diesel:	49 hp	36.5 kW

Optional equipment

Overhead guard	Light packages
ES (Extended Scrubbing)	Squeegee wand
Seat belts	Fire extinguisher
Audio-visual back-up alarm	Positive drain control
Spark arresting muffler	Autofill (with ES)
