Windsor Industries manufactures a full line of innovative floor maintenance equipment including:

- Carpet Extractors & Chemicals
- Vacuum Products
- Floor Scrubbers and Sweepers
- Floor Machines and Burnishers

Saber Cutter walk-behinds are built to make the person working with the machine more productive. These scrubbers give the operator and the maintenance person the performance and convenience features they need to get the job done faster.

To help you choose the most productive walk-behind for your facility, the Saber Cutter can be tailored to meet a variety of cleaning needs. The Saber Cutter Series can be ordered with different cleaning widths, battery systems, scrub head lift systems and solution tank capacities.

The Saber Cutter comes standard with Windsor's unique Aqua-Mizer system™. By using cleaning solution more efficiently, the Aqua-Mizer extends the time between tank refills by up to 50%. It does this using standard cleaning chemicals and procedures. It does not require that you switch to foaming surfactants or change your approach to scrubbing. The Aqua-Mizer is part of an advanced scrubbing and pickup system that make the Saber Cutter auto scrubbers the best value on the market for cleaning efficiency and safety.

Fast, Powerful, Easy to Use

Saber™ Cutter

Built to make the operator more productive

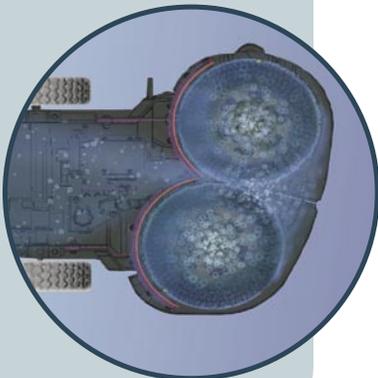

- Control panel

- Utility compartment

- Patented Aqua-Mizer System

Easy to Use

Saber Cutters feature an intuitive control panel with all operational functions within easy reach to reduce training times and increase worker productivity. The dramatic sloped design gives the operator the safety of an outstanding view of the work area. Saber Cutters also provide the convenience of the industry's first built-in accessory compartment for cleaning supplies, pads or brushes.

Added Productivity

Aqua-Mizer™ extends scrubbing times between refills by using cleaning solution more efficiently.

- Keeps solution in the scrubbing area longer, allowing the flow to be set at the lowest level and still provides enough solution to do the cleaning job.
- Increases run-time productivity by up to 50% per tank fill up.

- Easily changed brushes

- Easily removed front panel

- Convenient recovery tank clean-out

- Easy Access to Batteries

Easy to Maintain

Daily maintenance or service operations on the Saber Cutter have been simplified to increase productivity.

- Wide open anytime access to batteries for daily maintenance
- The easily removed front panel provides total access to brush and vacuum motors. The easy removal of the brush shrouds makes it easy to mount and remove brushes or pad drivers
- Convenient recovery tank clean-out
